

NEW B/W FOMA PHOTOPAPER IN RETRO LOOK

RETROBROM Sp 151 & RETROBROM Sp 152

- 
- ✓ B/W photopaper on a thick baryta base with a grade of Special (Sp)
 - ✓ Suitable for motives in retro style, portrait photography, but also other photo works (nude, still life, landscape, structure and detail, abstraction, etc.)
 - ✓ Very good exposure and development flexibility
 - ✓ The potential of a wide range of halftones in the resulting photo
 - ✓ A green-brown tone of the silver-image with a slightly green-yellow tint of the paper base
 - ✓ A possibility to change a colour tint by other type of developing bath
 - ✓ Gradation and tonal variability by processing in so called "lith" developers („lith print“)
 - ✓ The characteristics of the ultra fine-grained emulsion allow to use many types of positive as well as negative developing baths
 - ✓ The medium level of optical sensitivity is suitable for both technique of enlarging and also contact copying
 - ✓ A high comfort of work in a darkroom in pleasant colour of safety lighting - for example yellow-green or amber, or orange one
 - ✓ A special glossy type of the paper surface allows to apply the method of hot polishing (drum rotary and panelled stationary polishing machines)
 - ✓ The semi-matt type of paper surface is optimized to achieve an acceptable optical density value
